

EPS CUSTOMIZED "ACCUMULATION/UNSCRAMBLER" TABLES

The EPS accumulation turntables are designed to collect or dispense your products upstream or downstream of packaging machinery, such as shrink wrappers, carton-ing or bottle filling. EPS turntables are available in a variety of diameters to fit your requirements. The EPS turntable tops are precision cut and polished aluminum, making them excellent for pharmaceutical environments. The system is constructed with heavy-duty extruded aluminum legs and cross members with a high grade G3 scratch resistant plastic. Our simplistic design provides for easy maintenance and simplistic use. With adjustable legs, variable speed control and 110Volt, our units outperform and outlast others.

USES

Guards can be configured to RECEIVE cartoned, bottled, wrapped, or assembled items for final packaging and inspection. This unit can also be configured to FEED products to an assembly area, or as an Unscrambler to feed bottles, to a filling or packaging machine.

SPECIFICATIONS

Table Top Diameter:	Standard is 30" available to 60".
Outer Guard Height:	2" (can be custom configured specific to receive or transfer product)
Table Height:	33" without adjusting / leveling legs. 34-37" with adjusting leveling legs as shown
Turntable Drive:	90V DC Geared motor 1/20th hp.
Turntable Support:	Turntable is shaft supported with fine non -lubricated outer roller supports For long life 24/7 operation, simple "O" rings are changed within minutes during preventative maintenance operations.
Control:	Dayton with integrated On/off and Variable Speed Control
Frame	Anodized aluminum deep 1-5/8th channel.
Panels:	Panels are reversible and available in a variety of colors (standard is machine gray) and made from G3 Material, heavy dutyscratch resistance permanently bonded plastic.
Base:	24" x 24" standard up to 36" dia., 30" x 30"/42" dia.
Capacity:	100/lbs with standard drive. Large capacity available.
